

# *Aero*<sup>™</sup> Technology

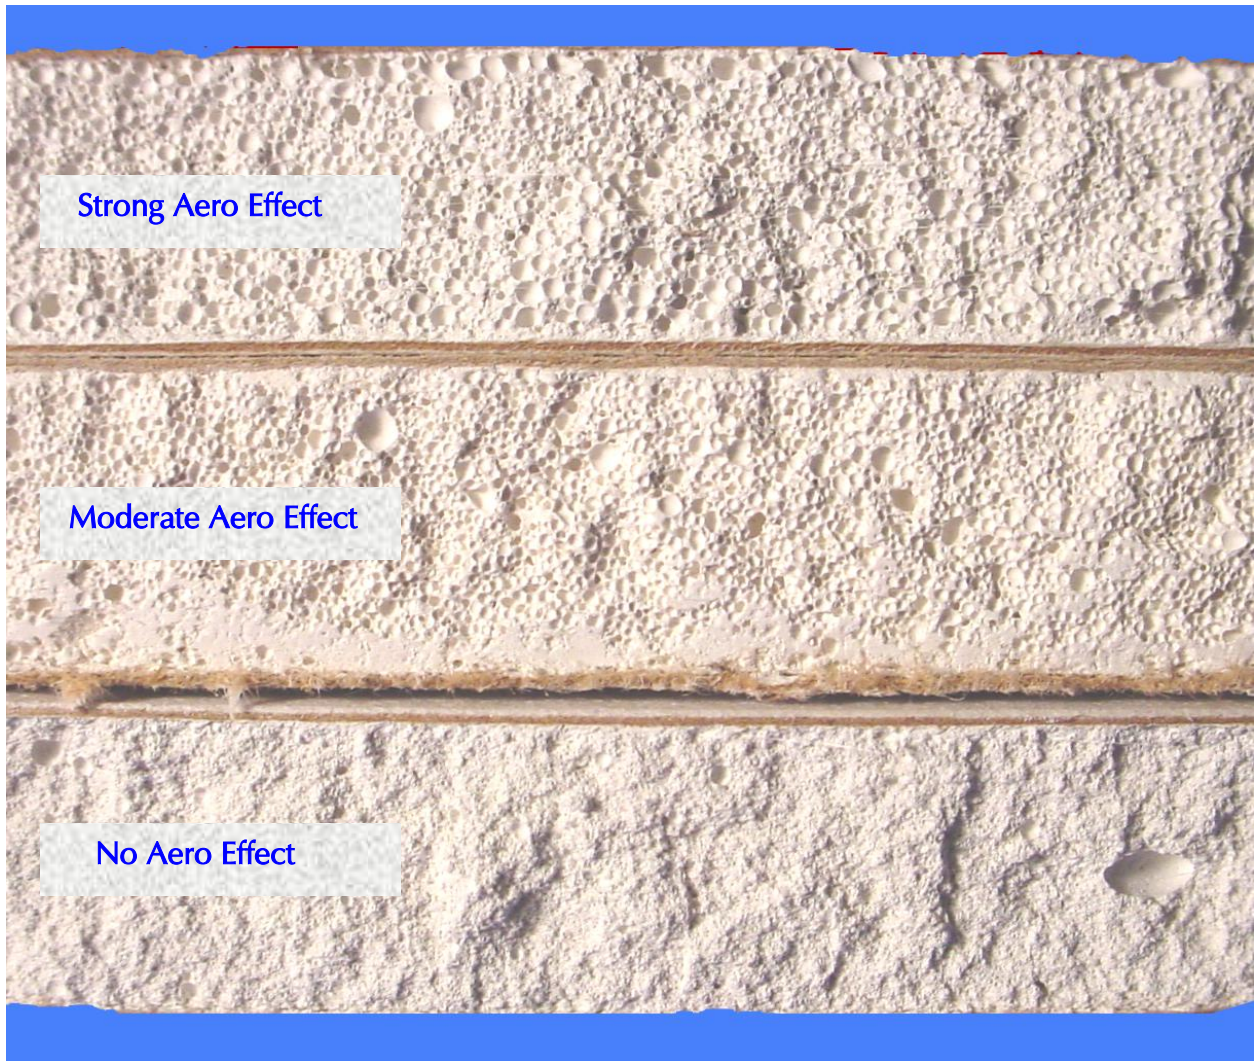

**Aero<sup>™</sup> Technology** is a combination of GEO Specialty Chemicals' dispersant and foaming agent that gives a unique and controllable bubble structure in gypsum wallboard through synergistic interaction.

This novel, patented technology allows savings through:

- lower gypsum board weights
- enhanced water reduction
- further kiln drying efficiencies as open core dries easier
- increased nail pull and core to paper bond strength
- facilitates the use of lower weight paper

This information is true and accurate to the best of our knowledge, but without any guarantee unless explicitly given. Typical properties should not be construed as specifications. Since the conditions of use are beyond our control we disclaim any liability, including for patent infringement, resulting from the use of these product, data or suggestions.

**Aero™ Technology** gives gypsum board manufacturers unparalleled flexibility. The degree of effect can be controlled depending on product and operational choices, allowing the balance between strength, weight and kiln energy requirements to be optimized •
